Team Talk

As we reach the end of one season, the work/fun never stops for the coaches and we would like to say a special thank you to all coaches, assistants, players and parents for helping to make the club work and have that family feel.

Most ages will wind down a little now. Next season we will be represented in 5 different league organisations which amongst other things means 5 different League AGMs the coaches have to attend (else feel the wrath of a FA fine).

The 2022/23 season officially starts here!

Chris McCormick and Andy Clifton

I originally volunteered to take on an under 6 group that my son Ted was playing in. As the team progressed (adding U7/U8) and the numbers grew I was dealing with 3 age groups and struggling. Andy had been coaching in schools and stepped in and volunteered to take the younger age groups (hero). Then my younger son started attending Andy's sessions which had nearly 30 players. Andy and I didn't want the younger ones to have to stop so as well as the U8s, we both also coach other age groups (Chris under 10, Andy under 9) so means we play on Saturday and Sunday

Coaching is really important and improving the players as footballers and as team mates is our priority. We both support modest local sides ourselves (Coventry and Birmingham) so have a healthy realism with what we do!!

The best thing about being a coach at any club is the enjoyment you see when the team have been working hard and all of a sudden they're doing things they weren't able to previously. We just want our players to keep on enjoying it. They're a fantastic bunch, who play football with a smile on there face

We would encourage anyone to get involved, what the club brings is more important than football, it's a fantastic community asset. I would also say even if a coach looks like they know what they're doing, it doesn't mean they wouldn't appreciate any kind of help, don't be afraid to step forward in any capacity. If you want to be involved or someone looks like they might need help they will welcome your support.

Our most used phrase to the players is Relax.....! You can't play football if you're not relaxed. You can see our philosophy is to not take the game side of it all too seriously!
